

Whidbey Island Horse Council

Meeting Minutes 6/3/2026

The meeting was called to order by coordinator Sally Garratt at 6:30pm. It was conducted in person and on zoom. Participants were introduced and the minutes from the last meeting were reviewed and approved.

The following topics were discussed:

Horse Council website development: The group discussed updating the website with a more engaging format that includes contact capture capabilities and specific information about activities like emergency preparedness and comp plan input.

Horse resource directory creation: The group explored options for creating a horse resource directory, considering both existing information from Rhed's website and new submissions, while being careful about privacy concerns and spam prevention.

Horse transportation: Barb presented documents about volunteer horse transport services and discussed the need to update liability releases with Washington state equine law language.

Emergency preparedness initiatives: Adam provided an extensive update on emergency preparedness training he received from the Department of Emergency Management, including information about evacuation locations, earthquake preparedness, and the potential for community self-sufficiency during disasters.

Equine economic impact survey: This initiative is still in the preliminary phase. We are working on building engagement and contact databases before launching the full survey.

The meeting was adjourned at 8pm. Although the next meeting was discussed, the July meeting was canceled due to summer activities and conflicts. The next meeting will be held on August 5, 2026 at 6:30pm at the Race Road Fire Station (1164 Race Road).
